

**IN THE ABSTRACT OF THE DISCLOSURE:**

Please replace the following Abstract of the Disclosure as follows:

A method and a system for managing information relating to boreholes and further an identifier utilized by the method and the system. An identifier (~~5~~) which includes machine-readable information is arranged in connection with a borehole (~~2~~) under examination. The readable information may be an identification code or, alternatively, measurement information on the borehole (~~2~~) to be stored in the identifier (~~5~~).
